+CityxChange – Innovation and Integrated Measures for Positive Energy Districts

Smart Otaniemi Energy Solutions for the Block Level,
Oulu | 12.09.2019

Bjørn-Ove Berthelsen (TK) | Dirk Ahlers (NTNU)

<http://cityxchange.eu/>

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 824260.

+CxC at a glance

- EU Horizon2020 - Smart Cities and Communities Lighthouse Projects (SCC-1)
- 32 partners in 10 countries (Trondheim - NO, and Limerick - IE: 2 Lighthouse Cities; 5 Follower Cities, 2 universities, 25 industry partners covering SMEs, non-profit, large enterprises)
- Main coordinator: NTNU
- November 2018 - October 2023
- €20 million in EU funding, €10.4 million in-kind funding
- 11 Concrete demonstrators at [TRL7](#) - less research, more deployment-focus
- Limerick first Lighthouse city in Ireland; Trondheim the second in Norway (after Stavanger)
- Co-creation and open innovation as a main principle: Citizen participation, outreach, open data and systems - "Open by Default"
 - First ever SCC-1 projects with 5% of budget (€1 million) for inter- and extra-project collaboration
 - 86% of 148 deliverables are open, only 20 confidential
 - Shared IP and open data
 - Participation in Open Research Data Pilot; funding for Open Access

Background

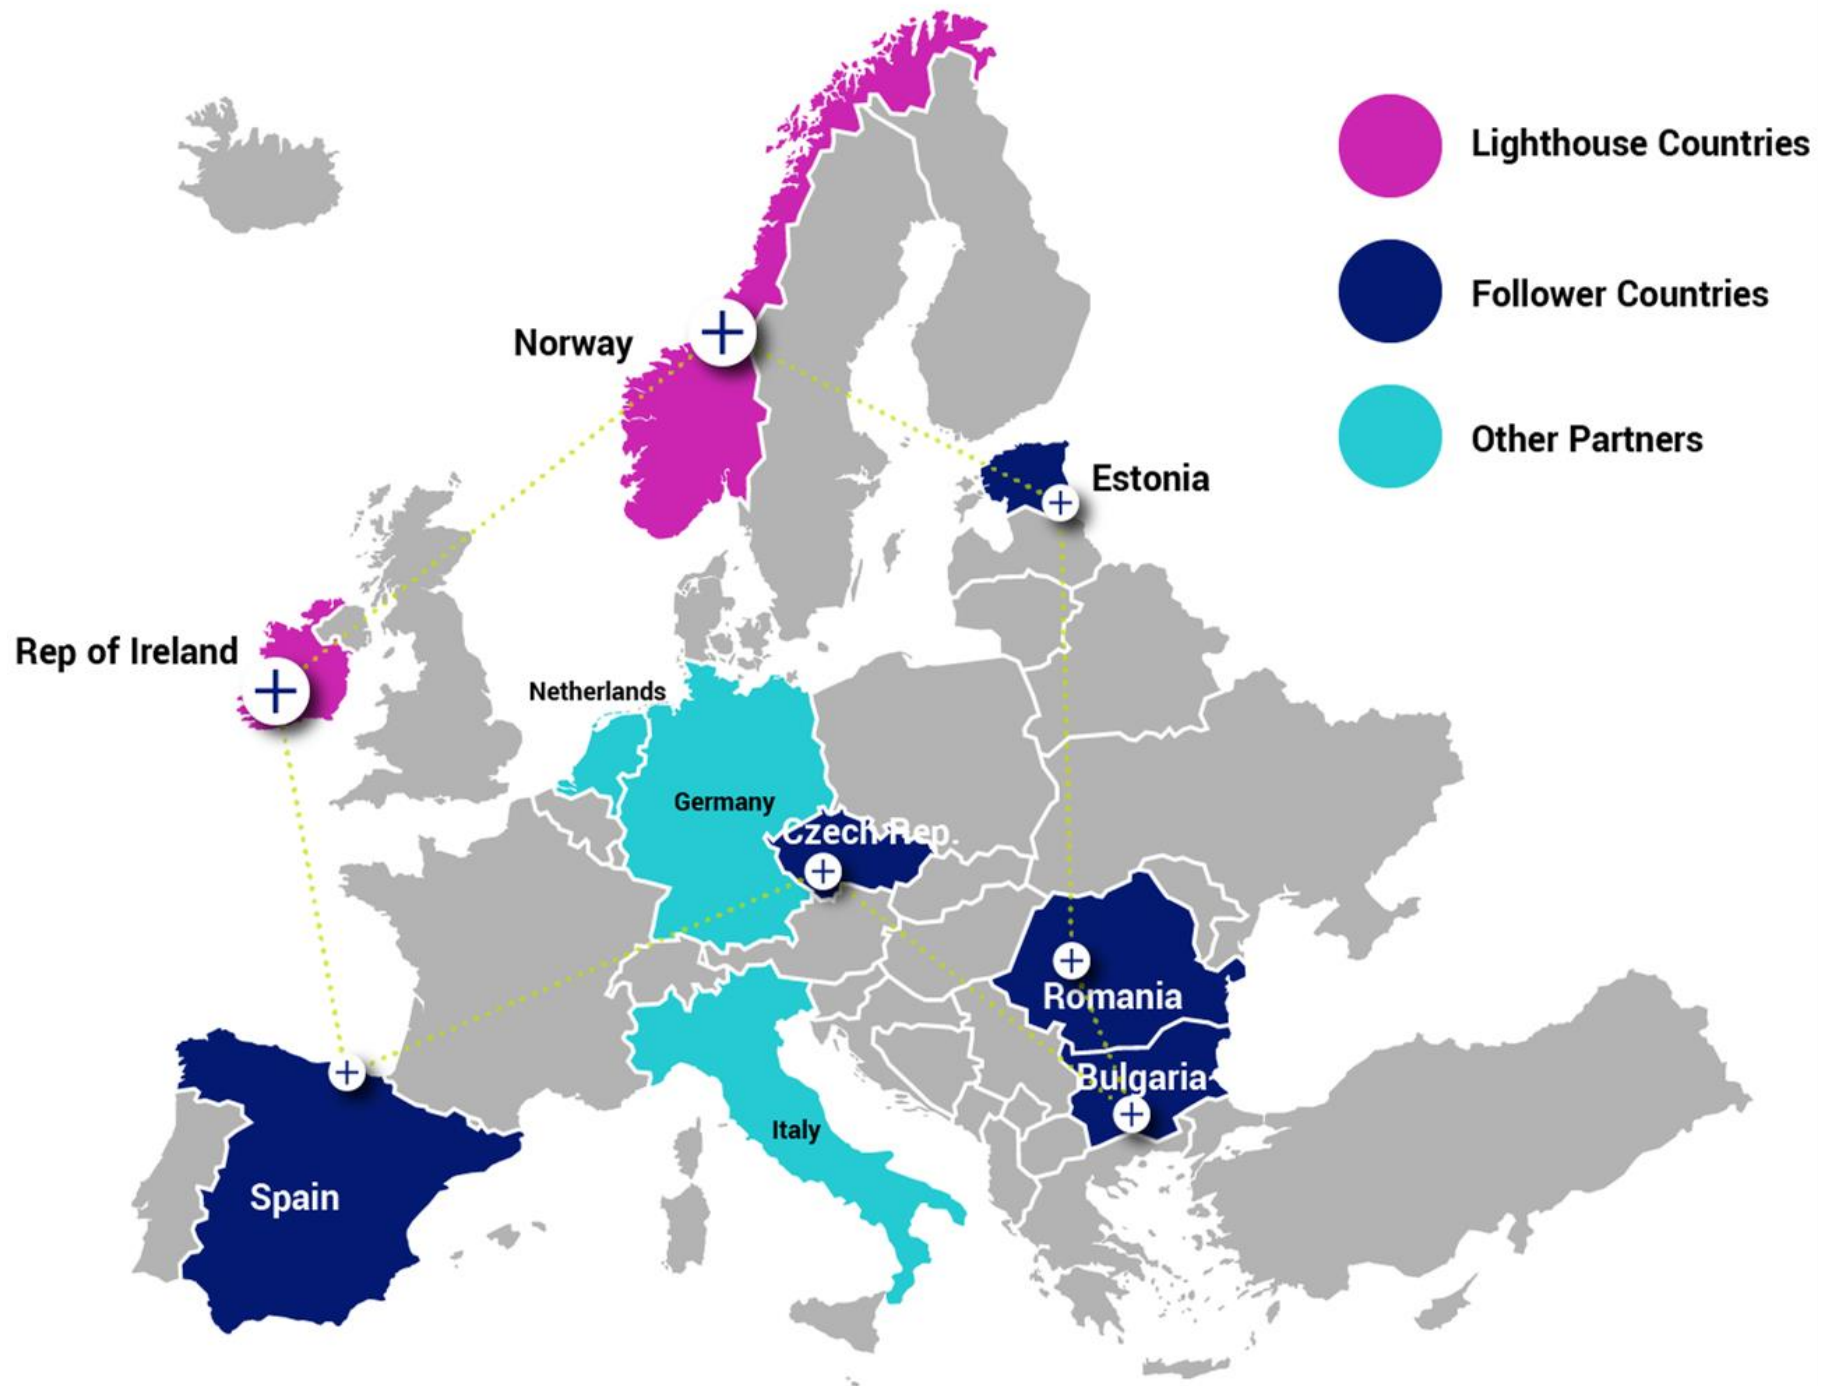

+CITYXCHANGE

Co-creating the project

Consortium building
and preparation with
32 partners

Cities

Consortium

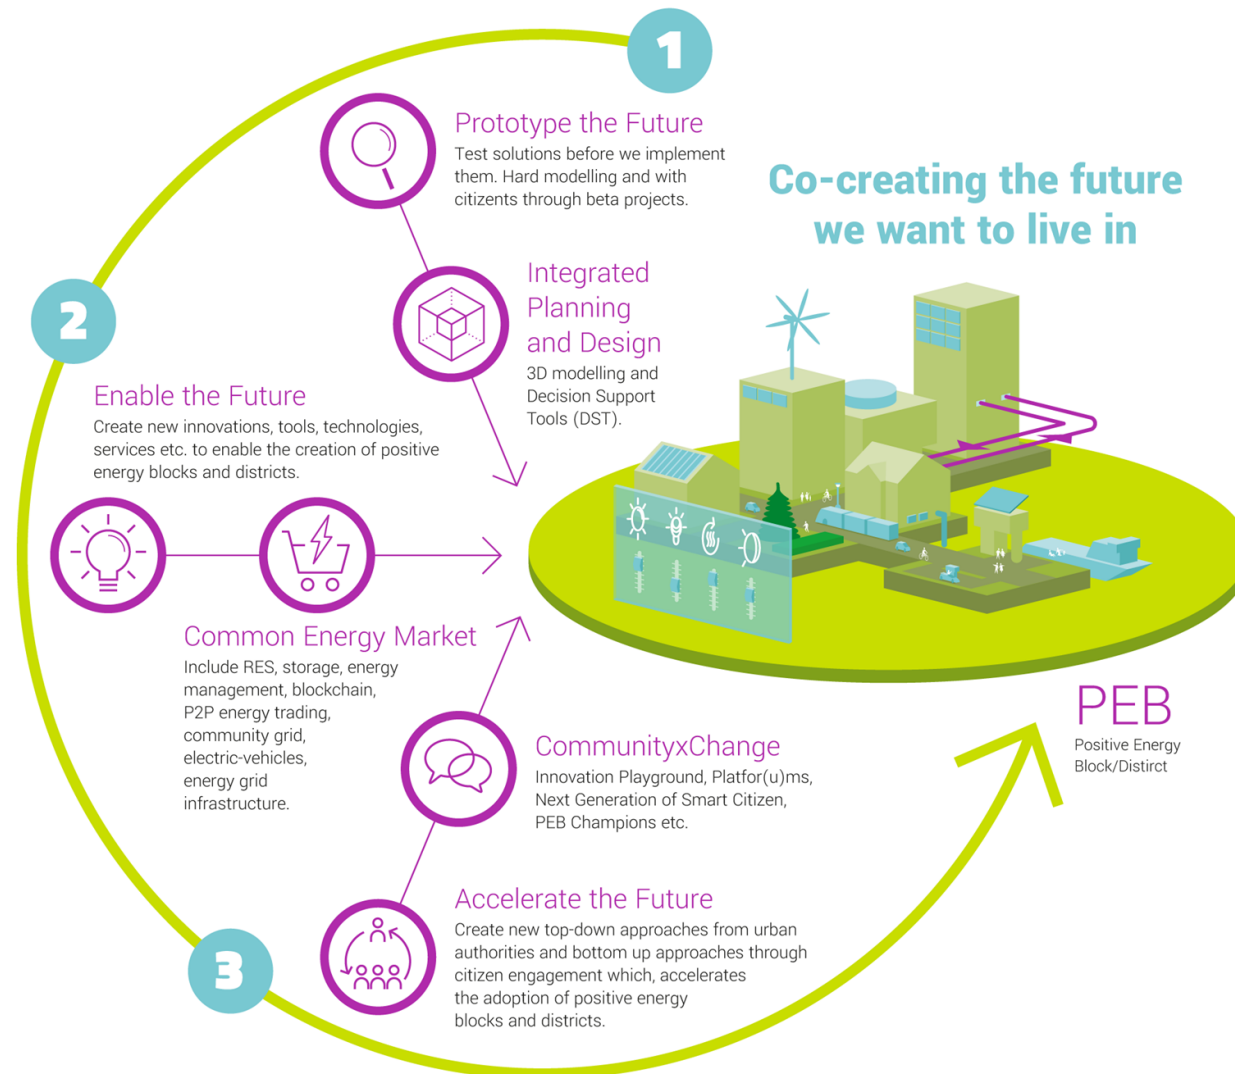

+CITYXCHANGE

Approach

Project Core

+CITYXCHANGE

City-Driven System Transition towards PEBs/PEDs

+CITYXCHANGE

EU driving the green energy transition

- [Winter Package](#): Transition to a renewable energy economy
- “Clean Energy for all Europeans”
- [EU 3. Energy Market Package](#): Inner market for EL and gas
- [SET Plan](#): Accelerate deployment of low-C technologies
- Positive Energy Buildings → *Blocks* → [Districts](#) → Cities
- Revised [Renewable Energy Directive](#) (December 2018)
- FP5 → FP7 → Horizon2020 → Horizon Europe

Demo Projects: Technology

ENVIRONMENTAL

Model (DP01)

Record data and provide integrated decision support to cities

SPATIAL

DPEB (DP06)

Create DPEBs through improved energy performance and integration with the energy system

TECHNICAL

Microgrids (DP07)

Balance and optimise energy in the PEB through Microgrids

TECHNICAL

EMaaS (DP08)

Integrate seamless e-mobility within the PEB

TECHNICAL

Local trading (DP09)

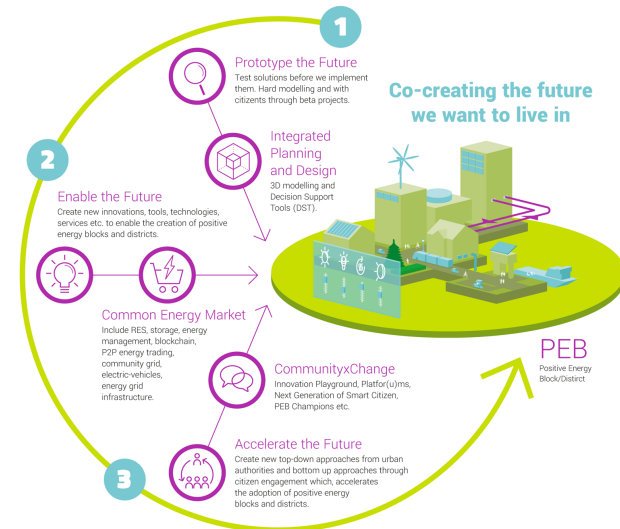

Enable Peer-to-Peer trading within the PEB

TECHNICAL

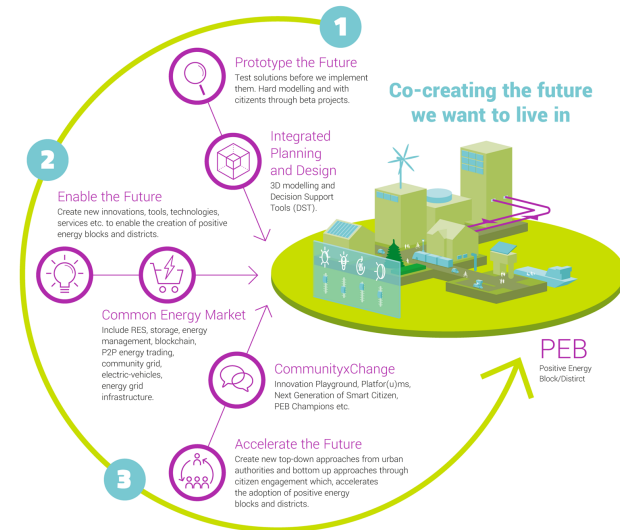

Flexibility market (DP10)

Enable a fair deal to all consumers through a flexibility market

+CITYXCHANGE

Demo Projects: Community Engagement and Scaling

SOCIAL

Engage (DP03)
Co-create Positive Energy Blocks

SOCIAL

Vision (DP02)
Co-create a Bold City Vision, to Plan, Implement, Replicate and Scale-up to Positive Energy Districts and Cities

LEGAL

Regulatory zone (DP04)
Enable innovation through regulation mechanisms

ECONOMIC

Invest (DP11)
Enable consumers to invest in their buildings, which is critical to the creation of a PEB

SOCIAL

Playground (DP05)
Accelerate change and disruptive solutions through innovation playgrounds

+CITYXCHANGE

Key innovations

Energy

- Reconstruct energy ecosystem: Divide energy concession areas into Community Grids; “rebuild from below”
- Establish Community System Operator - CSO - below DSO level
- P2P trade of energy (60 min.), capacity/effect (10 min.), and frequency alignment (1 min.)
- Local Flexibility Market with no/low limit for trading flexibility
- Special regulatory districts that enable open P2P trading
- Energy Trading Platform utilizing [blockless blockchain](#) with no/low transaction fees
- Energy Systems Integration with mainly software-based systems
- New TRL7 heat pumps - “packaging” - mobile container solutions

Mobility

- Highly flexible and scalable mobility platform; adaptable to “any” city at low costs
- Frontend acting as market place/one-stop-shop for public/shared, green mobility including micropayment solution
- EVs fully integrated with the Community Grid; EV batteries as energy asset/market player

Community

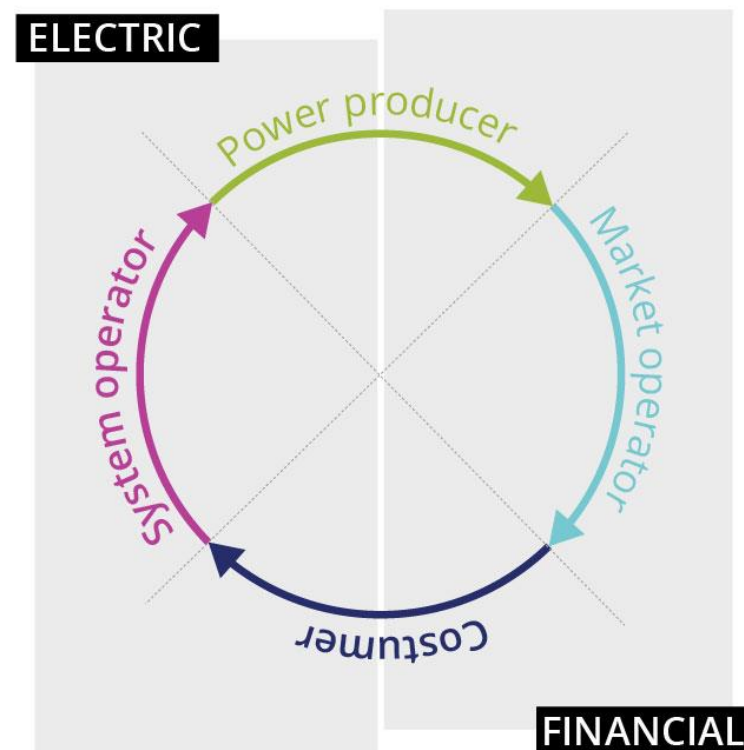

- Co-creation: cities + universities + solution providers + citizens; new framework and methodology
- Open Innovation
- “Next Generation Smart Citizen”
- Creating Innovation Spaces (SCC project office + Smart City + UniversityCity + Citizen Observatory)

“New business concepts, -models, and -products/services will emerge, enabling increased ROI and reduced payback times”

+CITYXCHANGE

The new energy market

From six to four roles

One player - two roles
-> producer/costumer

Digital data exchange and automatic operation

Market operation - executed by transparent and neutral role(s)

Local system operation includes local grid operation - micro or cit grid

Market operation requires digital interactions between roles

Local market may be connected to global pricing

+CITYXCHANGE

+CityxChange replication/upscaling Plan

- Replication integrated into the project, flow from Lighthouse Cities to Follower Cities
- Ambition to build replicable solutions that work in all 7 cities and beyond
- Roadmap to scale up the PEB pilots
- Detailed feasibility studies and replication project pipelines for Follower Cities
- Investment and business models to build & scale PEBs

City perspective and impact

+CITYXCHANGE

Why the City of Trondheim engages

- Citizen at the centre, open innovation
- Urban prototyping, experimenting, testing for new ways of working
- New jobs, businesses and business models; attract more investments
- Climate, energy, and local air quality
- New ICT-based services to improve urban quality
- Benchmarking and strengthen city position
- Competence/Experience for sustainable urban development
- Solutions and cooperation processes adapted to city's identity
- Strategic municipal vision for 2050, co-created with local actors

+CITYXCHANGE

Key points from a city perspective

- Cities at the core - city driven projects
- Anchoring at CEO level (project owner) + strong political anchoring
- City as a lab + strong R&D connection
- Work across silos

+CITYXCHANGE

TRD3.0

Societal learning and
UniversityCity -
Trd3.0

“Smart” sustainable
urban development &
democracy

+CITYXCHANGE

+CITYXCHANGE

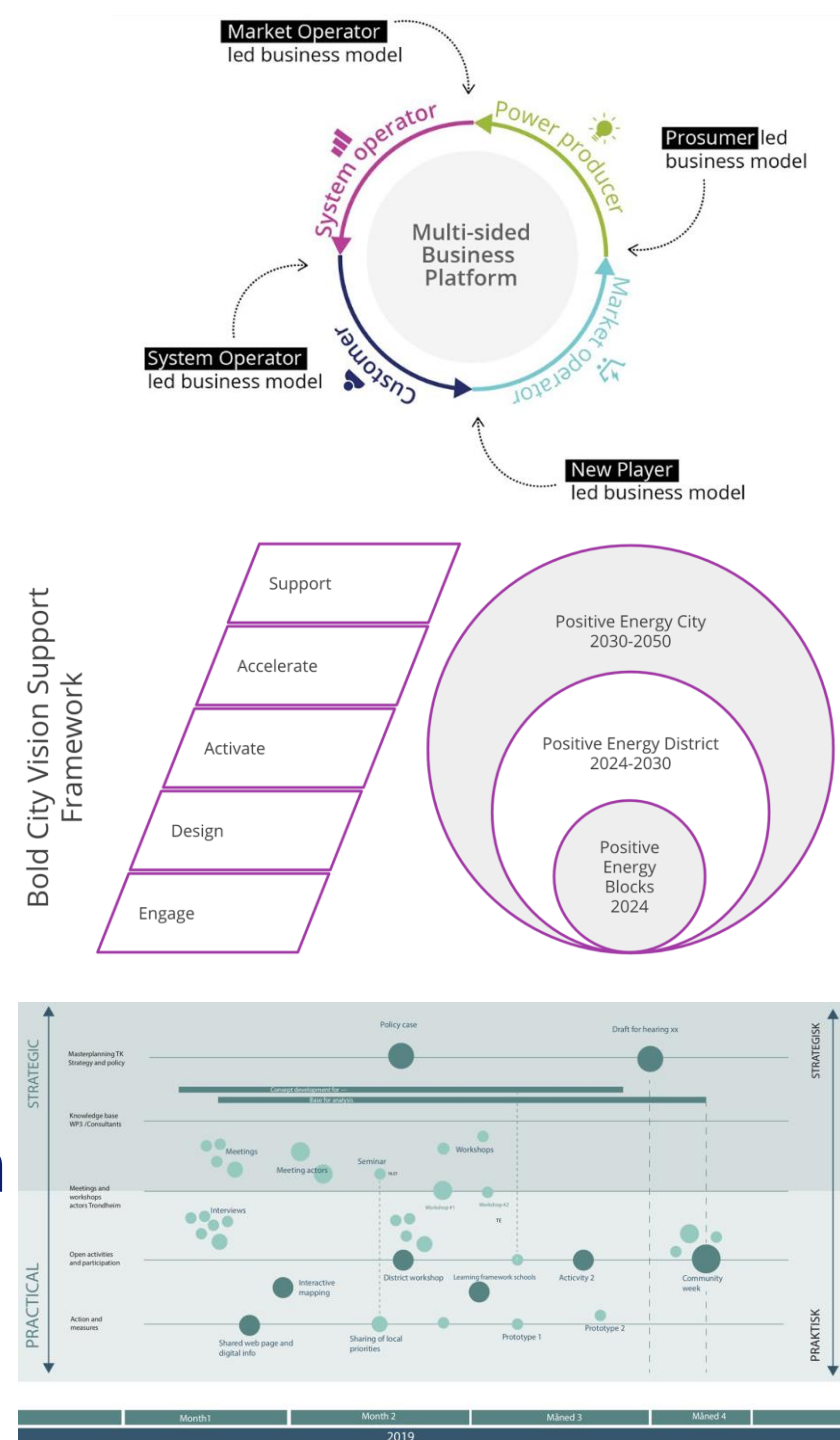

Relational welfare,
co-creation, and
Municipality 3.0

Achievements so far

+CITYXCHANGE

First 10 months

- Started one of the first large-scale projects on Positive Energy Districts
- Deeper planning and linking of project and demos in all cities
- Core Framework and Methodology done/developing
 - Regulatory issues on trading
 - Bold City Vision
 - KPI Framework
 - Market models
 - eMaaS
- Collaboration, interaction, replication

Knowledge Base

This database will grow to one of the central elements of the website and will include all public deliverables and other kinds of downloadable information. It is structured in different categories (deliverables, articles, news updates, presentations, technical papers, ...) and is further organised through the use of content-based and geographical tags.
