What is FIIF?

3

- Finnish Industrial Internet Forum (FIIF) is a company driven activity that boosts co-creation of activities capitalizing on **sustainable digitalization of Finnish companies and their businesses**.
- FIIF brings together appliers and providers of digital solutions with research organizations, and offers an open platform for **sharing experiences**, identifying **new business opportunities** and future trends, exploring **testing and piloting** activities, and formulating collaborative development actions.
- Established in 2014 by Technology Industries of Finland, part of DIMECC's portfolio since 2018.
- 180+ member organizations, 550+ individual contacts.
