

WHAT IS KOTEL R.Y.

The purpose of KOTEL is to promote Quality, Reliability and Efficiency of electronic components, equipment, systems and software design, manufacturing, procurement and maintenance.

To achieve these goals, the association strives for combining the knowhow of its member companies and associates and promoting overall co-operation. The other means and practical measures for success are training, seminars, development projects and various Working Group activities in the areas of electronics reliability, environmental requirements and characterization, environmental and life cycle compliancy, EMC, electronics corrosion, failure and material analyses and thermal management to name few.

Foundation of KOTEL was established 1967.

KOTEL r.y. is a Finnish association with close co-operation with domestic and international partners like SESKO, Teknologiateollisuus, FIIF, CEEES (Confederation of European Environmental Engineering Societes) and its European and Scandinavian affiliates.

KOTEL membership is scalable dependent on size of Your organisation in Finland. Membership provides full access to KOTEL knowledge assets and workgroup activities – it's all up to You. KOTEL also provides an easy set-up for joint projects between member organisations. Organisation can also join as a temporary member with a fixed term contract.

BENEFITS FOR MEMBERS

Connect your experts, teams and organizations by joining in the knowledge sharing in KOTEL members' workgroups. Our network has participants from over 40 member and associate companies/institutes. <http://www.kotel.fi/fi/tyoryhmat>

Solve your problems. Share resources & knowledge. Save time & money. Participate the cost-efficient development projects. <http://www.kotel.fi/fi/julkaisut/tiivistelmat>
